

RUBBER ANTISKID TAPE

RAT

GENERAL INFORMATION

RUBBER ANTISKID TAPE is a unique worldwide anti-slip solution, based on many years of research and experience. **RUBBER ANTISKID TAPE** is an innovative solution, which is entirely based on a new design — a symmetrically extruded anti-slip surface is something that has never previously been used in anti-slip materials. The tape features excellent adhesion to substrates, and the symmetrically extruded surface is aesthetic and at the same time features a high friction coefficient (COF). The top layer is made of plastics film and acts as a non-conductor (protects the user's hands or feet from the cold).

USAGE

European Union regulations

Directive 89/654/EC

§ 9.1 "The floors of workplaces must have no dangerous bumps, holes or slopes and must be fixed, stable and not slippery."

Directive relating to vehicles used for the carriage of passengers 2001/85/EC

§ 7.7.5.9 "The surface of gangways and access passages shall be effectively slip-resistant, also when they are wet or covered with oil."

§ 7.7.7.6 "All steps shall have a slip resistant surface, also when they are wet or covered with oil."

Universal application — tapes may be applied in all types of industrial, public, and sports and recreation facilities, as well as households.

AQUA ANTISKID TAPE, as a waterproof anti-slip product, is ideal for application in locations, e.g.: kitchens, food industry facilities, water pools, bathrooms, boats and all types of wet environments.

AQUA ANTISKID TAPE application method:

Prior to application make sure the surface where the tape is to be applied is clean, dry, free of any soiling. If needed, wash the surface with **PRO CLEAN-IT** or **PRO NOVAKLEEN**. Degrease the surface with **POWER K-SPRAY**, **POWER WIDE-JET DEGREASER** or **PRO SAFETY CLEAN**. Apply the tape, pressing it evenly on the whole surface.

CLASSIFICATION

Article code	Name	Packaging	Type
RAT	RUBBER ANTISKID TAPE	18.3 m/50 mm roll	tapes
