

power JET DEGREASER

JDG

GENERAL INFORMATION

POWER JET DEGREASER is an efficient and very fast acting degreasing agent in aerosol form. Thanks to innovative solutions (high working pressure and a special outlet nozzle), the **POWER JET DEGREASER** generates a strong stream, measuring up to 2 metres. Adding to this a unique chemical content, the **POWER JET DEGREASER** offers a wide variety of possible applications in removing stubborn soiling — e.g.: oils, lubricants, adhesives, resins, bitumens, etc. — from metal, glass, ceramic, fabric and most plastic surfaces, even from a great distance; **POWER JET DEGREASER** is especially efficient in degreasing locations with limited or difficult access. During cleaning and surface washing it leaves no stains nor smudges. It evaporates very quickly and fully. **POWER JET DEGREASER** also removes the majority of oxides from metal surfaces.

TECHNICAL DATA

Form (at 20°C): colourless liquid.
Flash point °C: < -18
Specific gravity: (at 20°C), g/cm³: 0.70
Water solubility: moderately soluble.
Boiling point °C: 58–170
Safety measures: provided in the safety data sheet.

USAGE

POWER JET DEGREASER is an ideal cleaning agent that may be used in all industries, workshops and on assembly lines. **POWER JET DEGREASER** is especially effective in the automotive industry (cleaning of linings and clutch discs, cleaning of disks and brake drums, cleaning of engine components). **POWER JET DEGREASER** is recommended also for surface preparation prior to adhesive bonding, sealing and painting, and in every location, where a 100% degreased, clean and dry surface is a must.
